

COMPANY OVERVIEW

Wise Components goes beyond distribution—we anticipate your needs with local warehouses, a dedicated fleet of union drivers, and rapid delivery across NYC agencies. As an ISO 9001:2015-certified distributor, we've built a proactive supply chain, preventing delays before they happen. Since 1975, our industry-experienced team has ensured you get the right products exactly when needed.

CORE COMPETENCIES

- Audio/Visual
- Coaxial Products
- Data Center Products
- Electronic Components
- Fasteners & Accessories
- Fiber Optics
- Fire Stop Products
- Grounding/Bonding Solutions
- Industrial Components
- Labeling Products
- Low-Voltage Cables
- Mechanical Components
- Motion Devices
- Optics
- Outside Plant
- Paging Systems
- Passive Optical Network (PON)
- Pneumatics
- Power Over Ethernet (POE)
- Power and Power Protection
- Printers, Labels & Labeling Systems
- Racks & Wire Management
- Security Products
- Structured Cabling
- Surface Raceway
- Tools & Testers
- Tubing and Sleeving
- Wireless Solutions
- Tubing and Sleeving
- UPS and PDU

PAST PERFORMANCES

SIEMENS HEALTHINEERS IRELAND AND TENNESSEE PLANTS

Manage an annual schedule order for Atellica in the Dublin plant —500 parts weekly to improve productivity and JIT delivery. Allow savings on international delivery, support documentation, combine multiple manufacturers under one roof, one invoice. Sato Printers is a major component of the blood analyzer. It is supplied on JIT schedule and has customized firmware pre-loaded. For Memphis, we purchase items in bulk (for cost savings) and repack them in single-pack quantities to avoid stock loss for aftermarket accessories. We also add custom labels to assist the receiving department.

ABBOTT VASCULAR

Serving multiple locations on a global basis. A single source for USA manufacturers, covering plant maintenance and MRO material. Assisting in cost savings for preventive maintenance items associated with on-site equipment. Serve the technicians and engineering staff on a weekly basis. Shipping items required to maintain line operation when they can't process an item internally... ie, vendor finance restriction (COD), do not allow international deliveries, supplier not on AVL, etc. Extend services to their supply chain. We assisted one isolated vendor located in Mauritius, Africa, with Tricorbraun Absorbing Desiccant Packs.

BOSTON SCIENTIFIC

We assist engineers and technicians with test area setup lines. Are the major supplier for Beldon/Emcor Data cabinets. Sell all major wire, electromechanical components associated with test builds. An invaluable one-stop source for all 'Made in the USA' non-approved vendors. We visit this site annually for many years, building and gaining new sales with each visit. EFD Nordstorm Pogo Pins has become a big part of what we supply. These were not on our supply list until we saw them on the line when in the plant.
